## Introduction

The escort market is worth more than \$180 billion worldwide and the number of sex workers is around 40 million. However, despite these huge numbers, there are no advanced apps that allow finding and booking trustworthy escorts anonymously in any city. ErosBook plans to solve this problem and become an international market leader.

We are launching an initial coin offering (ICO) to help us develop the first worldwide escort platform that combines verification, booking, scheduling, payment and reviews in a single interface. Cryptocurrencies and blockchain technology make perfect sense for an industry that requires a large volume of anonymous and reliable peer-to-peer monetary transactions.

ErosBook Coin (EROS) is the native token for the ErosBook apps and services. For clients and providers, it can be used as a means of payment and as a reward system for contributing to the community. For investors, it allows them to own part of the company and receive a percentage of the profits from a multi-billion dollar global industry.

This paper provides an overview of the ErosBook platform, its use of cryptocurrencies and how it can be utilized to create an innovative global escort platform. This is not intended as a deep technical paper, but an introduction to ErosBook for a general business reader.

Intended Audience: entrepreneurs, investors, cryptocurrency enthusiasts, escort agencies, sex workers.

## Market overview

The global sex market was worth over \$180 billion in 2020 and there is great potential for growth. In addition, there are also many problems and challenges in the escort market for which ErosBook is developing unique solutions.

### Escort market general facts

- Money spent on prostitution worldwide is more than \$186 Billion, with revenue by country estimated around \$73 billion for China, \$26 billion for Spain and \$24 billions for Japan.
- Worldwide, there are around 40-42 million sex workers, with at least 1 million in the United States and 5 million in China.
- 80 percent of the world's population of sex workers are female and younger than 25 years old.
- Since 1980, the number of men who purchase sexual services has doubled worldwide.

Source: <https://havocscope.com/prostitution-statistics/>

### Problems and challenges

#### For clients:

- Clients often spend a great deal of time searching to find a suitable match and communicating with escorts.
- Sometimes, clients are required to send sensitive information (telephone number, address, credit card) to escorts and agencies, especially if they are in a new city or traveling.
- It is difficult for customers to verify the pictures, age and other information provided by escorts. Some agencies and escorts use fake or heavily photoshopped images.
- It is difficult for clients to know if the chosen escort will live up to expectations and if the overall experience is worth the money invested.

#### For escorts and agencies (providers):

- It is time consuming to communicate with and answer clients. Most of the time, clients want to know more about the escort before scheduling a date.
- It is difficult to know that a new client is safe and the booking is genuine. An important percentage of client requests are canceled before the meeting or are fake.
- It is difficult to reach new clients without spending a lot on promotion. For escorts

and agencies, it is difficult to find customers who are visiting a new city for business or tourism.

- Escort directories and agencies take a huge fee from independent escorts that can reach up to 50 percent of their income.
- The sex worker profession and the consumption of sexual services are not recognized everywhere as legal and the industry has therefore been pushed into the shadow economy.

## **Our solution**

The ErosBook platform provides a safe, reliable and cost-effective solution to all these problems and inefficiencies. Our platform is designed and built to become an industry game changer. ErosBook is inspired by successful business models such as Uber and Airbnb. We're planning a global, anonymous and peer-to-peer ecosystem with a modern design, user-friendly interface, advanced technology and integrated crypto payments.

## The ErosBook platform

ErosBook is a next generation escort platform that allows genuine clients to quickly connect with trustworthy agencies and independent escorts. It integrates detailed search, booking, payment and screening into a single, user-friendly interface. Clients are able to input detailed search filters, browse all available escorts and make instant bookings. Escorts and agencies can view clients screening info, verify that the client is safe and accept payments. After a date is completed, the client can post the experience and rate the escort to provide other users with more information about the companion. Both parties can benefit from fast, efficient interactions, saving time and money in the process.

### ErosBook for Clients

- Clients can contact an escort or agency to make a booking with a few simple clicks.
- Using a genuinely live search, clients see real time results, showing exactly which escorts are available, with simple sort and filter tools to quickly find the best match.
- Ratings, scores, and comments give the clients an informed choice, with reliable information and detailed service reviews they can trust.
- User-led photo and age verification removes heavily photoshopped images and highlights those that are accurate, and allows for verifying that escorts are real.
- A rating and review system allows clients to share their experience and contribute to the community after their date is complete.

### ErosBook for Companions

- Escorts & agencies can create and publish a profile in seconds.
- Escorts are in total control of their pictures and profile, setting the services and rates they offer, adding their terms for a date and payment methods.
- In-app management tools help sex workers to stay organized, punctual and offer high levels of professionalism.
- Escorts can know which clients are real and avoid fake requests. Escorts can check that clients are safe and submit red flags that help other companions.
- Promotion tools such as boost profile and ads that help escorts reach new clients.

### Important notes

- ErosBook is a live escort directory that connects clients with escorts and agencies. We are not an escort agency, and like any escort directory, we don't manage, control, or employ any escorts.
- Clients / companions can only leave a rating and review after a confirmed booking to ensure that all the scores and experiences published are real.

## How it works

The ErosBook platform is designed to make the whole process of booking an escort easy and cost-effective, including searching for the desired profile, the booking request, the actual meeting and the post-date review and rating.

### Searching

Searching for an escort can be done in two ways. First, by using the directory page that contains a list of profiles with pictures. Multiple filters and sorting options are available, such as: city, age, rates, nationality and services. By clicking a profile, the user can view more detailed information about the companion and then proceed to the booking.

The second way is by using a step-by-step process where users choose the city, day and time of the meeting, duration of the date and other relevant parameters and then the app shows a list of available escorts and the client can choose one.

We also plan to include a map feature, where you can see the available escorts in your area and the distance and time from you.

### Booking

When a client finds a desired match, they can send a date request to the companion. The request includes day and time of the date, duration, price and place of the meeting (incall or outcall), along with any special requests from the client. To avoid payment problems, the client needs to have enough funds in their ErosBook wallet to proceed with the request. Then, the escort receives the request and can verify the client's profile and accept the request. Escorts who deny too many request without a valid reason may be blocked from using the app. When the escort accepts the meeting, the client receives a notification and the client can view the real-time location of the escort in their ErosBook app. A private chat between client and escort may also be included to make communication in the event of any problems easier.

### Meeting

When the escort arrives at the meeting location, the client has the option to cancel the date by paying the previously set up cancellation fee (around 5-10 percent). When the meeting is concluded, the funds that were previously reserved in the client's wallet are automatically transferred to the escort's wallet. The client can also add a tip they desire.

### Reviewing

The client will receive a questionnaire in the app, asking them to verify the escort information: age, pictures, appearance. The client can also give an overall rating and publish a brief comment or review of the overall experience.

The escort will also receive a questionnaire to review the client's profile. If there are any red flags (client didn't show, client displayed inappropriate behavior...), the escort can submit a warning so other escorts know about it. This info will only be available for other escorts after they receive a meeting request from the same client.

EROS token rewards will be given to both the client and escort after they successfully submit the verification. We plan to give back up to five percent of the rate paid for the date to both the client and the escort.

### **Other features for clients**

- Save favorites and experiences: Clients have the option to save their favorite escorts and consult them any time in the user area. They can also check their history of personal experiences.
- Report fake profiles: We will try to accept only escort profiles that are genuine, but users can also help us by reporting fake profiles or escorts with inaccurate photos.
- Crypto wallet and payments: The built-in crypto wallet will allow users to easily manage their funds, make instant bookings and receive promotions and discounts.

### **Other tools for Providers**

- Promotion tools: Escorts will have access to smart promotion options, such as: boost profile (the profile will be moved to the top of the list), x2 size ads (the profile occupies double the space of other profiles in the list), verified profile (we verify photos and age and add a 'Verified' tag on the profile) and other advertisement options.
- Report clients: Escorts can report any problems they have with a client to help build a safe community for all sex workers.
- Crypto wallet and payments: The built-in crypto wallet will allow independent escorts and agencies to easily manage their funds, pay for promotions, swap to other currencies and withdraw to their personal wallet.

### **Working prototype**

We are aware that a white paper or screenshots of the application are not enough to show the full potential of our project. That is why we released a beta version of our escort booking platform at [www.erosbook.io](http://www.erosbook.io). Anybody can create a free account and test the different features, including the admin areas for clients, escorts and agencies.

## Advanced features

We are building a bold future with advanced features and future expansions planned that will bring the ErosBook platform to another level. Some of these concepts are not even present in today's industry. We are happy to be always one step ahead.

- **Online meetings:** Live camera and chat for virtual meetings with your favorite companion.
- **Tours:** Clients can request that escorts come to their cities, escorts can announce trips and maximize their number of dates, necessary pre-travel fees can be arranged directly on the ErosBook app.
- **VIP club:** An exclusive area for high-profile escorts and clients and for special deals between them (including the option to sign non-disclosure agreements).
- **3D Tools:** Advanced video and photo options for escorts, even including a tool that generates a virtual 3D model of their body made from different photographs.
- **Reservations & full packages:** A full experience with your favorite escort that may include hotel, restaurant, transport, wellness and any other amenity.
- **Personal assistants:** Independent escorts can have a virtual assistant at a low-cost who helps organize dates, manage client requests and other functions.

## Technical design

The ErosBook platform will be developed as a state-of-the-art solution in terms of security, scalability, versatility and stability. Its modular architecture will enable a smooth implementation of new features and integration with third-party solutions. The following section discusses various technical considerations and sheds some light on the most important processes and components in the platform.

The ErosBok platform will consist of:

- The backend, built on PHP using the Laravel or Symfony frameworks and hosted on premium providers.
- The web application frontend and the Android application frontend, using the latest development technologies and standards.
- Possibly an iOS application frontend (the final decision will depend on legal and technical issues).

### Technology and security

An extensive cyber-security framework is implemented to ensure that strict measures and practices are in place to protect customers sensitive information against any eventualities and threats. We are conducting periodic stress tests and security audits to ensure compliance with the strictest security standards.

- 2FA to ensure account security and prevent any unauthorized access to user's accounts.
- Encrypted SSL (https) to encrypt and secure our website's traffic.
- All passwords are cryptographically hashed while all other sensitive data is encrypted.
- Cloudflare to mitigate potential distributed denial-of-service ("DDoS") attacks.
- Regular tests and check-ups by our technical team.

### Crypto assets protection

The ErosBook platform will offer the most secure and adaptable solution to store and manage crypto assets, with industry-leading security and technology and specialized risk management configurations.

- Ninety percent of funds are maintained in cold storage with multisignature technology.
- In both 'cold' and 'hot' vaults, one comprehensive system protects digital assets.
- Funds are available to withdraw 24 hours a day, seven days a week.

## Token specifications

The EROS token is created on the Ethereum platform, following the ERC-20 specifications. The contract will be accessible to the public/open source and verified by independent auditing companies. The maximum issue amount of EROS is 500 million tokens.

Name	<b>ErosBook Coin</b>
Symbol	<b>EROS</b>
Platform	<b>ETH - ERC20</b>
Type	<b>Utility</b>
Total Supply	<b>500 million</b>
Price	<b>\$0.025</b>
Hard Cap	<b>\$6,250,000</b>

## Use cases

ErosBook Coin (EROS) is the utility token for the ErosBook ecosystem. For clients and escorts, it provides incentives to publish and review accurate information about escort profiles and user experiences. EROS can also be used to pay for the various services of the ErosBook apps (bookings, profile promotion, VIP memberships). For investors, it allows them to be part of the company and receive a percentage of the profits of a multibillion-dollar industry.

### Get rewarded to submit content

- Clients can get free EROS rewards by making good use of the platform. For example: for reviewing escort profiles, submitting new experiences and completing bookings successfully.
- Escorts & agencies can get free EROS rewards by being active on the platform. For example: for publishing accurate information and accepting all bookings on time.

### Mean of payment:

- Clients can pay to book escorts with EROS. EROS payments will have a discount compared to other payment methods.
- Users can activate different membership plans, depending on the amount of EROS paid. Based on the membership plan chosen, users will gain access to exclusive benefits: more information about escorts, priority support and access to VIP escorts.
- Escorts & agencies can pay with EROS for ErosBook services. For example: for verified profiles, to boost profiles and for ads and promotion.
- Escorts can activate different membership plans, depending on the amount of EROS paid. Based on the membership plan chosen, escorts will gain access to exclusive benefits: advanced publication tools, priority support and access to VIP customers.

### Stake Tokens, receive dividends

- ErosBook coin will allow anybody to own shares of the company and receive monthly/quarterly dividends. A shares pool will be created representing 100 percent of the shares of the company. The only way to own shares will be by having EROS. This creates natural demand for the token. The profits of the platform will be paid automatically as dividends to shareholders.

## Allocation

Out of the total supply of 500 million EROS, 70 percent of the tokens are sold during the seed sale and public sales of the ICO. All investors who bought EROS during the ICO can sell their tokens immediately when EROS gets listed on exchanges. The tokens owned by team members and advisors are completely blocked for 12 months (until the end of 2023) and cannot be sold during this period. Some tokens are reserved for community events, such as affiliate commissions, airdrops and bounties and in-app rewards. Unused tokens from the affiliate program or the airdrop and bounties will be added to the liquidity.

### Token Sale

**70%**

- Offered for sale during the seed sale and public sale.

### Affiliates\*

**3%**

- Reserved for commissions paid to affiliates.

### Airdrop & Bounties\*

**3%**

- Given for tasks that help to promote the ICO.

### In-App Rewards

**6%**

- Given to users that contribute to ErosBook when the app goes live.

### Team & Advisors

**6%**

- Owned by ErosBook team members. Locked for 12 months.

### Partnerships

**4%**

- Funding strategic partnerships and listing on exchanges.

### Liquidity

**8%**

- For auto-swap features in the ErosBook app and for liquidity on exchanges.

\* Unused tokens from the affiliate program or the airdrop & bounties will be added to the liquidity.

## Funds usage

We are committed to building a superior escort platform and a successful, trustworthy company. Accordingly, we will invest the majority of the total hard cap of \$6,250,000 from the token sale into strategic and tactical initiatives to achieve this objective. As with any technology startup, most of the funds raised will be used to develop and promote our apps and associated services. As we insist on transparency and security every step along the way, we want to show clearly how the use of funds will be arranged and how we intend to develop this project further.

### Development

**30%**

- All cost derived of the development of our product: engineering, website development, design, mobile apps, blockchain technology, payments.

### Operation

**10%**

- Day to day operations and administration, including costs of running servers, office space, taxes, personal, customer support, etc.

### Marketing

**40%**

- We believe marketing is the most important element to achieve a broad reach into the mass market. That is why we plan to spend huge resources in strategy focused on growing by cities. This includes ads, promotion, influencers, ambassadors, mass campaigns.

### Reserve

**20%**

- Because our project is open to further expansions and advanced features, we reserve important resources for this issues. Also we must consider that we are working in a difficult legal environment.

## ICO sales calendar

The ErosBook tokens sale consists of a Seed Sale and a Public Sale that is divided into three periods with decreasing discounts.

EROS tokens are available for purchase with different cryptocurrencies, including major cryptos, such as BTC, ETH, LTC, stable coins, such as USDT, USDC, TUSD and privacy-focused cryptos, such as XMR, DASH, ZEC. Unsold token may be available for sale when the app goes live at a price no lower than \$0.025.

### Seed Sale

Tokens for sale	<b>50 million EROS</b>
Supply for sale	<b>10%</b>
Token price	<b>\$0.005</b>
Discount	<b>80%</b>
Time	<b>AUG 29 - SEP 26</b>

### Public Sale 1

Tokens for sale	<b>100 million EROS</b>
Supply for sale	<b>20%</b>
Token price	<b>\$0.015</b>
Discount	<b>40%</b>
Time	<b>OCT 24 - NOV 21</b>

### Public Sale 2

Tokens for sale	<b>100 million EROS</b>
Supply for sale	<b>20%</b>
Token price	<b>\$0.020</b>
Discount	<b>20%</b>
Time	<b>NOV 21 - DES 19</b>

### Public Sale 3

Tokens for sale	<b>100 million EROS</b>
Supply for sale	<b>20%</b>
Token price	<b>\$0.025</b>
Discount	<b>0%</b>
Time	<b>DES 19 - JAN 16</b>

## Token integration

### Rewards for contributing

The EROS token will be fully integrated into our website and mobile apps. Clients and providers will receive free EROS tokens for participating in the ecosystem: completing bookings, verifying information and publishing reviews.

Clients will get in-app rewards for:

- Verifying escorts profiles (age, pictures, services, accurate information)
- Publishing content (rate escort, write experience or review)

Providers (escorts/agencies) will get rewards for:

- Accepting bookings on time
- Verifying clients (location, behavior)

### Other types of rewards

Clients and escorts may receive EROS rewards from our loyalty program, which means that by completing milestones, they can earn a lot of rewards. Clients and escorts may receive random EROS rewards and bonuses from time to time.

### EROS for payments

All users can use EROS to pay for the various services on the ErosBook platform, such as:

- Clients can pay for bookings in EROS.
- Clients can pay for premium and VIP memberships with EROS.
- Clients can use EROS to pay cancelation fees or to reserve funds for tours.
- Escorts and agencies can use EROS for promotion tools and ads.
- Escorts can pay for premium and VIP memberships with EROS.

Payments made with ErosBook coin (EROS) will have a discount compared to other payment systems.

## Business model

Our business model is based on the following revenue streams:

- Premium and VIP plans for clients.
- Premium and VIP plans for escorts/agencies.
- Paid promotion tools and ads for escorts/agencies.
- Service fee between 2-5 percent charged for every booking made using our app.

### On-demand vs. paid plans

We have studied and considered these two models:

- Flat-rate plans: clients and escorts pay a monthly or yearly subscription to access the ErosBook apps and services.
- On-demand system: we charge a % fee for every transaction made between clients and companions.

There is an option to have both systems, allowing escorts and agencies to choose which one is better for their use of the app. A minimum percentage fee is useful to prevent fraudulent meetings. In some jurisdictions, the percentage fee model may not be legal, and then we will only charge the monthly flat rate. A hybrid model could be the best solution, where we charge a small service fee for every booking, plus we offer a free plan and paid premium and VIP plans for clients and escorts.

The final business plan and revenue system will evolve with the development and implementation of our platform, with the aim of always meeting an equilibrium point between the profits for our investors and the cost-effectiveness for clients and escorts.

### Plans and memberships

We will offer access to premium and VIP memberships for both clients and escorts.

Memberships for clients:

- Free: basic options.
- Premium: detailed profiles, view offline profiles, priority support, higher rewards.
- VIP: view VIP profiles, tours, priority booking, virtual assistant.

Memberships for providers (escorts/agencies):

- Free: limited number of bookings.
- Premium: unlimited bookings, unlimited photos-videos, higher rewards.
- VIP: access to VIP clients, tours, personal assistant.

## Flexible plans

We will study and implement flexible solutions that suit the different uses of the apps for both clients and escorts.

Plans according to time:

- Short periods (3 days, 1 week), useful for traveling.
- Monthly plans.
- Yearly plans.

Plans according to geography:

- One city.
- One country.
- Worldwide.

Clients and companions can create combinations of different plans. For example, one client can purchase a one-year plan for his home city, plus a three-day plan for another city he is traveling to. The existence of plans for different locations with different prices also helps the app adjust to the local economic conditions of each country.

## Financial projections

To study the financial projections of the ErosBook platform, we considered the following scenario:

- Worldwide market revenue rounded to 200 billion/year for the next years.
- 40 million sex workers.
- Average \$100 per hour (conservative estimate).
- Average 50 hours worked per year (some escorts only work for a few weeks).
- Average \$5k revenue per escort/year (conservative estimate).

	Cities	Providers	Revenue model A (\$100/year plan)	Transactions	Revenue model B (5% fee)
Year 1	5	400	<b>\$40,000</b>	20,000	<b>\$100,000</b>
Year 2	20	4,000	<b>\$400,000</b>	200,000	<b>\$1,000,000</b>
Year 3	50	40,000	<b>\$4,000,000</b>	2,000,000	<b>\$10,000,000</b>
Long-term	500	800,000	<b>\$80,000,000</b>	40,000,000	<b>\$200,000,000</b>

The expected revenue in the third year after launch is between \$4-10 million.

The long-term scenario means presence in all major cities and tourist locations with a 2 percent market share of the global escort market. We believe that we can reach this target with a lot of effort, good work and a massive promotion.

The long-term target will provide between \$80 and \$200 million per year in revenue. If we subtract a 10-20 percent operational cost, the expected profit is between \$64 and \$180 million/year.

In revenue models A and B, we are only considering the revenue from escort plans or the 5 percent service fee. We still need to add the client premium-VIP plans and income from ads and promotion tools for escorts, which will further increase the revenue. We are going do more in-deep studies in the future and share them with ICO investors.

## Investors mechanism

For legal reasons, a security token for the ErosBook platform is not being considered. However, we think that it is important to share the future success of our business with ICO investors. That is why we will integrate a mechanism in our platform to ensure that holders of EROS tokens can get part of the profits of the platform directly to their wallet.

The mechanism for investors will be a 'pool of shares.' Investors can stake their tokens for a period of time and automatically receive monthly or quarterly dividends (paid in crypto or stable coins of their choice). There will be no fixed number of shares, the total tokens staked will represent 100 percent of the company. For example, if there are 90 million EROS staked and an investor adds 10 million EROS, now the total EROS staked are 100 million and the investor owns 10 percent of the pool and receives 10 percent of the profits. Some of the characteristics of this 'pool of shares' are:

- Minimum amount to stake (to avoid free rewards being staked)
- Maturity factor (favors long-term investors)
- Voting system (holders can vote on important decisions)

This concept also increases the intrinsic value of EROS tokens because the staked tokens will not be available for sale on exchanges, meaning fewer tokens in circulation.

To calculate the profits of ErosBook, we will take all the revenue and subtract 10-20 percent for operational expenses. The profits will be distributed to investors as dividends on a monthly or quarterly basis. Investors will receive the profits in their built-in ErosBook wallets and will be able to swap to other currencies or withdraw to their personal wallets.

## Development roadmap

The ErosBook ICO starts on September 2022. At the same time, a beta version of the escort booking platform will be launched. We plan to complete the ICO crowdsale by the start of 2023. In Q1 2023, we will distribute the EROS tokens. We plan to launch the production version of our web app in Q2 2023 and the mobile versions for clients and escorts in Q3 2023. In Q4 2023, we will upgrade our app with advanced features, such as: escort tours, VIP accounts and more.

### SEP 2022

- ICO Seed Sale
- Web App Beta version

### Q4 2022

- ICO Public Sale
- White paper

### Q1 2023

- Token creation and distribution

### Q2 2023

- Web App Production version (searching, booking, verification)
- Token integrated for in-app rewards, payments

### Q3 2023

- Mobile App for Escorts
- Mobile App for Clients
- Token listed on exchanges

### Q4 2023

- App Advanced features (tours, VIP area)

## Conquer cities

After the first year of development, we will focus on expansion and improving our apps and services. We will put our best effort into making ErosBook successful with a 'conquer city by city' strategy similar to what Uber does. Upon launching in a new city, we will find ambassadors and influencers, reach the maximum amount of sex workers, use affiliate programs ('invite a friend' feature), etc. We plan to be present in any big worldwide city and tourist location in few years

## Team & advisors

**Alfred Wieser**

Founder & CEO

**Paul Lampert**

Software & Blockchain developer

**Julia Eberle**

Marketing

**Christoph Vogt**

Financial & Compliance

**Tina**

Advisor

### Team expansion

If we complete the crowdsale successfully, we will expand the team with new members and advisors for the different phases of development. These are some of the profiles that we will incorporate:

- Web and mobile app development team.
- City ambassadors, influencers, promoters.
- Customer support team, virtual assistants for escorts.
- New advisors for blockchain technology, legal issues, startup growth, sex industry.

## ICO promotion & rewards

### Airdrop

ErosBook is giving away a total of 3 million EROS (worth \$75,000) to participants. New users who sign up and follow ErosBook on social media can earn up to 400 EROS reward (worth \$10). The airdrop reward will decrease in each phase of the crowdsale.

Seed Sale	<b>400 EROS</b>
Public Sale 1	<b>300 EROS</b>
Public Sale 2	<b>200 EROS</b>
Public Sale 3	<b>100 EROS</b>

### Bounty program

The ErosBook bounty program offers a total of 12 million EROS (worth \$300,000) for users who contribute to promoting the ICO. Rewards can be claimed for completing specified tasks, such as social media posts, YouTube videos or reviews and articles.

Twitter weekly campaign	<b>up to 800 EROS/week</b>
Facebook weekly campaign	<b>up to 800 EROS/week</b>
Instagram weekly campaign	<b>up to 800 EROS/week</b>
Bitcointalk weekly campaign	<b>up to 1600 EROS/week</b>
Reddit post bounty	<b>up to 1600 EROS</b>
Ico review bounty	<b>up to 300 EROS</b>
Blog / article bounty	<b>up to 1800 EROS</b>
Youtube video bounty	<b>up to 5400 EROS</b>

### Affiliate program

The ErosBook ICO Affiliate Program offers affiliate commissions to users who help promote the ICO. Affiliates can earn up to +5% EROS from up to three levels of referrals. For example, if a direct referral purchases a total of 1,000 EROS tokens, then 50 EROS (5%) will be added to the affiliate's wallet.

Direct referrals	<b>+5% EROS</b>
2nd level referrals	<b>+2% EROS</b>
3rd level referrals	<b>+1% EROS</b>

## Disclaimer

The information in this whitepaper is subject to change or updates, and should not be construed as a commitment, promise or guarantee by ErosBook or any other individual or organization mentioned in this whitepaper regarding the future availability of token-related services, or their future performance or value. ErosBook, including the whole project, token, website, smart contracts and any apps as stated in this conceptual paper, is not licensed nor regulated, and is not a financial or investment service, nor a payment or electronic money service in any country or jurisdiction. Any terminology used in this whitepaper, on the website or inside the app is a descriptive guideline only, and does not constitute regulated, investment or financial services activity. The EROS token is strictly a utility token in all jurisdictions and is not and cannot be considered a “security” or otherwise regulated token of any kind. ErosBook is not in any way e-money and/or fiat money, or an asset-backed stable coin, whether global or limited in scope. This whitepaper taken by itself is not a contract or a contractual agreement of any kind, nor is it an invitation, solicitation or offer to invest in ErosBook or acquire or use EROS tokens in any way and with any expectation of profit therefrom. Any user of ErosBook represents and warrants that such user has received appropriate technical, administrative, regulatory and legal advice before and after accessing and/or reading this whitepaper or the website, and/or using any portion or element of ErosBook (including the EROS token). The user hereby acknowledges and accepts that there is an inherently high risk in accessing, acquiring or using any kind of blockchain and/or crypto system, token, platform, software or interface, including EROS, and further disavows any claim of any kind against any community member directly or indirectly involved with ErosBook, for any damage suffered, including total loss. Cryptocurrency is unregulated in several jurisdictions. The value of cryptocurrencies may go down as well as up. Any profits may be subject to capital gains tax.
